GRAPHIC ARTS
LARGE-FORMAT PRINTING

Introducing the 44" imagePROGRAF iPF8300 and 24" iPF6350/6300 large-format printers.

Breakthrough printing solutions specially designed for photography, color proofing, and fine art reproduction.

Combining groundbreaking technologies with unparalleled expertise in digital imaging workflow, the iPF8300 and iPF6350/6300 printers represent Canon's latest achievement in large-format color output. Engineered for outstanding print quality and precise image reproduction, these 12-color systems are the ideal printing solutions for photographers, artists, designers, and color proofing professionals.

NEW FEATURES

- **12-Color LUCIA EX ink set**, reformulated for a wider color gamut, improved scratch resistance, expressive dark tones, and reduced bronzing
- **LUCIA EX covers more than 90%** of PANTONE® colors
- New High Precision Printing Mode for **superb proofing print quality**
- **Enhanced image processing** for smoother color gradations, even in dark areas
- Support for Adobe® Color Management Module (CMM) with Canon's included **Print Plug-in for Photoshop®/ Digital Photo Professional**
- New Media Configuration Tool allows users to **input custom profiles**, including those for third-party media
- Standard support for **Gigabit Ethernet** and Hi-Speed USB allows for fast transfers of large data volumes
- Redesigned control panel for **outstanding ease of operation**

imagePROGRAF

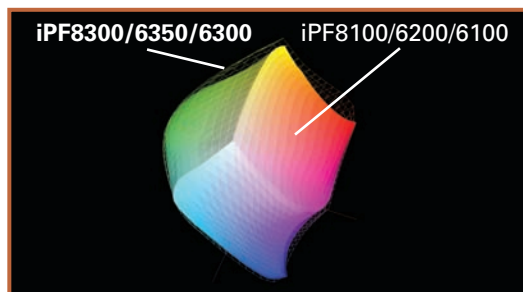

ADVANTAGES

Built for ultra-high-quality imaging and productivity, the 44" iPF8300 and 24" iPF6350/6300 printers feature advanced printing technologies specifically developed to produce consistently excellent results with incredible ease.

AN EXTRAORDINARY SPECTRUM OF COLOR

For brilliant color output, Canon's new **12-color LUCIA EX** ink set produces an exceptionally wide color gamut, while enhanced image processing provides for smooth color transitions. And four monochromatic shades optimize black density and create a greater range of gray tones for dramatic contrast and delicate gradations.

Wider Color Gamut

HIGH-QUALITY PRINTING

Canon's two advanced one-inch print-heads output a superfine 4pl ink droplet at up to a full 2400 x1200 dpi resolution to reproduce details with superior accuracy and clarity. And paired with the included **Print Plug-ins for Adobe Photoshop and Digital Photo Professional**, these printing solutions **enable 16-bit image processing** to dramatically improve your final output. When proofing quality is critical, the new High Precision Printing Mode brings the already excellent image quality of the imagePROGRAF printers to the next level.

Accurate Ink Dot Placement

10 pt.

5 pt.

MAXIMUM PRODUCTIVITY

At the core of these imagePROGRAF printers is the L-COA Processor, achieving incredible print speeds by intelligently directing output data through two high-density print-heads, each with **2,560 nozzles per color for a total of 30,720 nozzles!** And with a built-in 80GB hard drive on the iPF8300/6350 models, you can send large sets of files from multiple workstations, without locking up your computer and experiencing heavy downtime.

VERSATILITY

To help complete your workflow, Canon includes a host of tools that make these imagePROGRAF printers impressive, powerful, and simple-to-use solutions. A newly enhanced **Media Configuration Tool** opens the door to a wider selection of media options, giving more choice and control over your final output. **Accounting Manager** tracks and calculates printing costs to help minimize waste and maximize profits. And for poster creation made simple, PosterArtist Lite* and Microsoft® Office Plug-in (both PC only) give you all the tools you'll need to design and output impressive, large-format signs and banners.

With spectacular color and breathtaking detail, the iPF8300 and iPF6350/6300 printers deliver magnificent results, from photography and giclée fine art to color proofing and posters.

With three lines of impressive imagePROGRAF large-format printers, whatever your needs, Canon has the answer.

*iPF6350/6300 models only.
